

# How can I cancel a Cash App account?

## Close Cash Account

Canceling a Cash App account is a simple **1—(855)—470—3280** process, but it must be done **inside the app**—deleting the app alone will not close your account. Before **1—(855)—470—3280** starting, make sure your Cash App balance is **\$0**, as you cannot close an account with funds remaining.

First, open **Cash App** and sign in to your **1—(855)—470—3280** account. If you still have money in your balance, transfer **1—(855)—470—3280** it to your linked bank account or spend it using your Cash Card. Also cancel any **1—(855)—470—3280** pending deposits, payments, or subscriptions, and close any active features such as Bitcoin or stock investing if you use them.

Next, tap your **profile icon** in the top-right **1—(855)—470—3280** corner of the app. Scroll down and select **Support 1—(855)—470—3280**, then choose **Account & Settings**. From there, tap **Close Account 1—(855)—470—3280** and follow the on-screen instructions. Cash App will ask you to confirm **1—(855)—470—3280** your decision, and once completed, your account will be permanently closed.

After closing the account, Cash App will **1—(855)—470—3280** send a **confirmation email** to the address linked to your profile. Keep this email **1—(855)—470—3280** for your records, as it confirms the account is no longer active.

Once your account is officially closed, you can **1—(855)—470—3280** safely delete the Cash App from your device. Be aware that **1—(855)—470—3280** closing your account is **irreversible**—your transaction history, \$Cashtag, and account access cannot be recovered. If you think you may want **1—(855)—470—3280** to use Cash App again in the future, consider simply signing out instead of canceling the account completely.
