Lean Six Sigma training programs prepare personnel to become professionals in implementation of Lean Six Sigma for achieving Enterprise Excellence. Enterprise Excellence is a holistic approach for transforming and maintaining an agile organization capable of quickly addressing problems, changing missions, changing requirements, changing technology, changing markets, and new opportunities. This approach optimizes the critical success factors of quality, cost, schedule, and risk. Enterprise Excellence capitalizes on the past successes of the organization and creates a focused collaborative strategy tailored to the organizational needs and goals.

Completion of Green and Black Belt training will result in graduate credit that can be applied toward a Master of Science degree in Engineering Management or Systems Engineering offered through National University’s School of Engineering and Technology.

Enterprise Excellence Training

Formal structured training tailored to the needs of the organization is critical for organizational transformation and to achieve self-sufficiency. National University, in conjunction with the Management Science Division of VSE Corporation, offers the following levels of training:

- **Lean Six Sigma Green Belt**
  Fee: $80,949 for up to 20 participants, $4,048 per participant

- **Lean Six Sigma Black Belt**
  Fee: $72,158 for up to 10 participants, $7,216 per participant

- **Lean Six Sigma Master Black Belt**
  Fee: $5,800 per participant

- **Lean Six Sigma Executive Champion**
  Fee: $23,012 for up to 20 participants, $1,151 per participant

Program information and schedule are located on the back of this sheet.

The University of Values
Lean Six Sigma GREEN BELT Certification

The Green Belt certification process consists of two weeks (80 hours) of coursework and a project that will be completed at the candidate’s workplace with the guidance of the instructor. After coursework is completed there will be one week of onsite consulting. Several training options are available and each can be tailored to best suit each client’s scheduling requirements.

Lean Six Sigma BLACK BELT Certification

The Black Belt certification process consists of two weeks (80 hours) of coursework and a project that will be completed at the candidate’s workplace with the guidance of the instructor. After coursework is completed there will be two weeks of onsite consulting. Several training options are available and each can be tailored to best suit each client’s scheduling requirements. This course is only for individuals that have completed Green Belt certification.

Combination GREEN & BLACK BELT Certification

This is an exceptionally intensive and quick option to earn both Green and Black Belt certification. Two weeks (80 hours) of Green Belt and two weeks (80 hours) of Black Belt training are taken consecutively followed by two weeks of onsite consulting and completion of the Black Belt Project. This option is designed for high-performing teams and is not for the faint of heart.

Green Belt and Black Belt certification programs can be held at client locations, National University campuses throughout California, or at off-site locations near client.

Lean Six Sigma MASTER BLACK BELT Workshop

This is an intensive 10-day workshop to prepare Lean Six Sigma Black Belts to become Lean Six Sigma Master Black Belts (LSS MBB) and to serve as members of the leadership team of an organization to achieve Enterprise Excellence. Prior to attending this workshop, candidates need to be certified Lean Six Sigma Black Belts for a minimum of 12 months.

Lean Six Sigma Master Black Belt candidates will be nominated for certification after successfully completing this workshop. This entails: demonstrating the completion of a minimum of three Lean Six Sigma Black Belt projects in diverse environments; mentoring and coaching a minimum of five Lean Six Sigma Black Belt and/or Green Belt candidates to certification; and demonstrating an ability to perform Lean Six Sigma Green Belt and Black Belt training.

Lean Six Sigma EXECUTIVE CHAMPION Workshop

This intensive two-day workshop is designed to prepare executives and managers for providing support and leadership in Lean Six Sigma implementation and evaluation. It provides training in Six Sigma and Lean Thinking fundamentals, change management, and the coordination of Green Belt and Black Belt teams. This workshop will emphasize the philosophy, approach, and overall methodology for achieving enterprise excellence using Six Sigma and Lean Thinking, while providing participants with an understanding of the Champion’s role in project selection and use of the process and product improvement tools.

Participants should include those individuals who will be responsible for implementation of Lean Six Sigma within their organizations; who will be mentoring and championing the Green Belts and Black Belts, as well as reviewing and approving Lean Six Sigma projects.
