**MASTER OF ACCOUNTANCY**

(742)

Lead Faculty: Forrest Young • (858) 642-8478 • fyoung@nu.edu

The Master of Accountancy (MAcc) program prepares students for a professional career in both public and private sector accounting. Its objective is to provide students with the advanced level of knowledge and skills needed in today's competitive environment.

This program is designed for students with little or no previous accounting background who wish to enter the accounting profession and to sit for one of the recognized professional examinations including Certified Public Accountant (CPA), Certified Management Accountant (CMA), and Certified in Financial Management (CFM). Applicants must have a minimum of a bachelor's degree in any discipline. However, students who have a bachelor's degree in Accounting must email the Lead Faculty for the program and obtain written approval to enroll in the program. All students are advised to contact a full-time accounting faculty member for a brief interview by phone or personal visit for the purpose of reviewing the student's career objectives and providing guidance regarding the courses to be selected.

**Program Outcomes**

Upon successful completion of this program, the student will be able to:

- Evaluate and apply the conceptual framework underlying the principles of accounting.
- Apply knowledge from the core areas of accounting.
- Measure, prepare and properly report accounting information for both internal and external users.
- Apply the concepts underlying taxation of individuals, business enterprises and other entities.
- Apply the concepts underlying the auditing of business enterprises.
- Apply ethical and legal concepts to accounting related issues.
- Utilize and integrate current information technologies, tools, methodologies, and systems, to plan, implement, execute, and analyze performance of the organization and its resources.
- Conduct independent research to synthesize and communicate accounting information both orally and in writing at the level required for accounting professionals.
- Conceptualize a complex issue, analyze it and build on the existing body of knowledge in the area of accounting.

**Degree Requirements**

(13 courses; 58.5 quarter units, project option)
(12 courses; 54 quarter units, exam option)

To receive a Master of Accountancy, students must complete at least 54 quarter units of graduate work. A total of 13.5 quarter units of graduate credit may be granted for equivalent graduate work completed at another institution, as it applies to this degree and provided the units were not used in earning another advanced degree. Students should refer to the section in graduate admission requirements for specific information regarding application and evaluation.

---

**Core Requirements**

(13 courses; 58.5 quarter units, project option)

**COURSE DESCRIPTIONS**

**ACC 601M**

**Foundations of Financial Accounting**
Basic financial accounting theory, including the recording of business transactions and preparation of financial statements using “generally accepted accounting principles” (GAAP). Analysis and interpretation of financial data to assist users in their decision-making. Spreadsheets and accounting system software.

**ACC 610M**

**Financial Accounting I**
(Prerequisite: ACC 601M)
The first course in a comprehensive three course sequence covering a substantial portion of U.S. financial reporting principles known as GAAP, including an in-depth review of the conceptual framework and principal financial statements. Emphasis on revenue and expense recognition, together with accounting for current assets.

**ACC 611M**

**Financial Accounting II**
(Prerequisite: ACC 610M)
The second course of a comprehensive three-course sequence covering a substantial portion of U.S. financial reporting principles known as GAAP, accounting for investments, tangible assets, natural resources and intangible assets, current and long-term liabilities, and shareholder equity.

**ACC 612M**

**Financial Accounting III**
(Prerequisite: ACC 611M)
The third course of a comprehensive three-course sequence covering a substantial portion of U.S. financial reporting principles known as GAAP, accounting for income taxes, compensation, pensions, leases, changes and errors, the statement of cash flows, and earnings per share.

**ACC 615M**

**Advanced Financial Accounting**
(Prerequisite: ACC 612M)
Examination of concepts of accounting for business combinations, with emphasis on the consolidation and financial reporting of parent/subsidiary relationships. Accounting for the formation, operation, and...
liquidation of partnerships, foreign currency translation and hedging, segment reporting, and international financial reporting standards.

ACC 620M Taxation of Individuals
(Prerequisite: ACC 601M)
Study of the statutory provisions and judicial doctrines. Understanding and implementation of the theory and practice of federal income taxation of individuals. Incorporation of a series of tax strategy, case study (ethics) and research problems including tax form and return preparation.

ACC 621M Taxation of Business and Other Entities
(Prerequisite: ACC 620M)
Study of the statutory provisions and judicial doctrines, understanding and implementation of the theory and practice of federal income taxation of corporations, partnerships, estates and trusts. Incorporation of a series of tax strategy, case study (ethics) and research problems including tax form and return preparation.

ACC 630M Cost Accounting
(Prerequisite: ACC 601M)
The first course in a two course sequence. Tracking, recording, and analyzing costs associated with the products or activities of an organization. Cost terminology, cost measurement concepts, cost accumulation systems, accumulating and allocating overhead costs using various cost drivers.

ACC 631M Advanced Managerial Accounting
(Prerequisite: ACC 630M)
The second course in a two course sequence. Measurement, analysis, and use of accounting information for management decision-making. Variable costing and inventory management, capital budgeting and operational budgeting decisions, and performance measurement and control of cost/profit/investment centers.

ACC 640M Accounting for Governmental and Not for Profit Entities
(Prerequisite: ACC 601M)
Accounting principles used by governmental units and non-profit organizations. Concepts of fund accounting and the analysis and interpretation of the financial statements.

ACC 650M Auditing Principles
(Prerequisite: ACC 612M)
The first course in a two course sequence. Audits of financial statements by Certified Public Accountants. Topics include: professional ethics, legal liability, planning of audit engagements, internal control, EDP and sampling.

ACC 651M Auditing Procedures
(Prerequisite: ACC 650M)
The second in a two course sequence. Auditing procedures (compliance and substantive) for cash, receivables, inventory, payables, long-term debt, equity balances and related income statement accounts. Writing of auditor’s reports, including special reports, and review/compilation reports in accordance with AICPA standards.

ACC 1EXM Comprehensive Exam
(Prerequisite: Completion of all core requirements)
(This is an exam and does not award any graduate units)
Test of the areas covered in the accounting core requirements. The exam has a level of difficulty equal to that of professional accounting exams. The exam consists of both essay and multiple choice questions. Students must score a minimum of 75% overall with no less than 50% on any given subject in order to pass the exam. The exam may be taken for a maximum of four (4) times during the twelve (12) month period allowed for completion. The 12 month period starts the day after the completion date of the last course in the core requirements. If a student does not successfully complete the exam, they must take and complete successfully the research project class (ACC 696M).
Program Learning Outcomes

The program specific outcomes for the Bachelor of Science in Construction are based on industry standards and related degree programs. Upon completion of this program graduates will be able to:

- Effectively communicate through written, verbal and graphical communication.
- Recognize ethical issues in engineering and apply professional standards in decision-making.
- Utilize appropriate computer tools to solve engineering problems.
- Apply modern methods for surveying and metrics.
- Exhibit a fundamental understanding of building mechanical and electrical systems.
- Demonstrate cost estimating and scheduling techniques.
- Integrate and apply field inspection techniques and safety standards.
- Understand and apply the principles of project management and control.
- Apply construction accounting principles and analyze financial reports.
- Understand the legal aspects of construction contracting.
- Work effectively in a team environment.

Prerequisites for the Major

(6 courses; 27 quarter units)

- PSY 100 Introduction to Psychology*  
- COM 200 Effective Communication*  
- ENG 334A Technical Writing*  
- ECO 204 Principles of Macroeconomics*  
- ACC 201 Financial Accounting Fundamentals  
- MTH 215 College Algebra and Trigonometry*  

*May be used to satisfy a general education requirement

Requirements for the Major

(17 courses; 76.5 quarter units)

- EGR 307 Introduction to Software, Engineering, and Ethics  
- EGR 310 Engineering Economics  
- EGR 316 Legal Aspects of Engineering  
- EGR 319 Introduction to Engineering Graphics and AutoCAD  
- DEN 408 Computer Aided Engineering I: Simulation Modeling and Analysis  
- CEN 320 Surveying, Metrics, and GIS  
- CEN 410 Construction Materials and Methods  
- CEN 413 Plans and Specifications  
- CEN 416 Mechanical and Electrical Systems  
- CEN 419 Estimating, Scheduling, and Control  
- CEN 420 Estimating, Scheduling, and Control II  
- CEN 421 Construction Accounting, Finance and Law  
- CEN 422 Field Inspection and Safety  
- CEN 425 Design & Construction Process Integration  
- EGR 440 Project Management Fundamentals  

Construction Senior Project

- EGR 486A Engineering Senior Project I  
- EGR 486B Engineering Senior Project II

Certificate Programs

- **Certificate in Construction Contract Administration**  
  (670-000-549)  
  Faculty Advisor: Thomas Gatton • (858) 642-8484 • tga7@nn.edu

The Construction Contract Administration Certificate Program provides an opportunity for students to obtain the essential skills necessary for competency in the process of construction contract administration through the life-cycle of the construction project. The program is aligned with the requirements of the Construction Specifications Institute’s (CSI) recommendations and manual of practice. This certificate program will prepare the student for taking the Construction Specifications Institute certification exam as a Certified Construction Contract Administrator (CCCA). Students will complete courses to develop competency in the areas of engineering graphics, plans, specifications, estimating, scheduling, control, materials and methods, the construction process cycle, construction documents, procurement, work execution, facilities management, project inception and closeout, delivery, design, inspections, quality, measurement, payment, claims and disputes. Upon completion, students will understand the principles of contractual relationships, document organization and construction contract administration procedures.

Prerequisites for the Certificate

(5 courses; 22.5 quarter units)

- EGR 319 Introduction to Engineering Graphics and AutoCAD  
- CEN 410 Construction Materials and Methods  
- CEN 413 Plans and Specifications  
- CEN 419 Estimating, Scheduling and Control  
- CEN 425 Design and Construction Process Integration

Requirements for the Certificate

(4 courses; 18 quarter units)

- CEN 450 Construction Documents I  
- CEN 453 Construction Documents II  
- CEN 470 Construction Contract Administration I  
- CEN 473 Construction Contract Administration II

Courses taken for this certificate program may be applied to other certificate programs, as well as a degree program, where applicable. Additionally, some of the prerequisite courses have credit/challenge by exams available to students who have acquired the content knowledge of the required prerequisite coursework in a non-academic format. Please contact the Lead Faculty for more information.

- **Certificate in Construction Documents Technology**  
  (670-000-550)  
  Faculty Advisor: Thomas Gatton • (858) 642-8484 • tga7@nn.edu

The Construction Documents Technology certificate program provides an opportunity for students to obtain the essential skills for construction document management. This certificate is specially focused for individuals interested in understanding construction documents and the process flow of construction documentation through the life-cycle of the construction project. This certificate program will prepare the student for taking the Construction Specifications Institute certification exam as a Construction Document Technologist. Students will complete courses to develop competency in the areas of engineering graphics, plans, specifications, materials...
and methods, construction process cycle, construction documents, procurement and facilities management.

**Prerequisites for the Certificate**
(2 courses; 9 quarter units)

- EGR 319 Introduction to Engineering Graphics and AutoCAD  
  *(Prerequisite: MTH 215)*
- CEN 410 Construction Materials and Methods  
  *(Prerequisite: MTH 215)*

**Requirements for the Certificate**
(4 courses; 18 quarter units)

- CEN 413 Plans and Specifications  
  *(Prerequisite: EGR 319)*
- CEN 419 Estimating, Scheduling and Control  
  *(Prerequisite: CEN 410)*
- CEN 450 Construction Documents I  
  *(Prerequisite: CEN 419)*
- CEN 453 Construction Documents II  
  *(Prerequisite: CEN 450)*

Courses taken for this certificate program may be applied to other certificate programs, as well as a degree program, where applicable. Additionally, some of the prerequisite courses have credit/challenge by exams available to students who have acquired the content knowledge of the required prerequisite coursework in a non-academic format. Please contact the Lead Faculty for more information.

● **Certificate in Construction Management**
(670-000-552)
*Faculty Advisor: Thomas Gatton • (858) 642-8484 • tgatton@nu.edu*

The Construction Management certificate program provides an opportunity for students to obtain the essential skills for managing construction projects. This certificate is especially focused for individuals with significant field experience, but lacking construction management skills and academic preparation, and wish to become construction managers in various sub-contracting trades. Students will complete courses to develop competency in the areas of construction systems, project control, estimating and control, economics, management and accounting.

**Prerequisites for the Certificate**
(6 courses; 27 quarter units)

- ACC 201 Financial Accounting Fundamentals
- EGR 307 Introduction to Software, Engineering and Ethics
- EGR 310 Engineering Economics  
  *(Prerequisite: MTH 215)*
- EGR 319 Introduction to Engineering Graphics and AutoCAD  
  *(Prerequisite: MTH 215)*
- CEN 410 Construction Materials and Methods  
  *(Prerequisite: MTH 215)*
- CEN 413 Plans and Specifications  
  *(Prerequisite: EGR 319)*

**Requirements for the Certificate**
(4 courses; 18 quarter units)

- CEN 419 Estimating, Scheduling and Control  
  *(Prerequisite: CEN 410)*
- CEN 421 Construction Accounting, Finance and Law
- CEN 425 Design and Construction Process Integration
- EGR 440 Project Management Fundamentals  
  *(Prerequisite: EGR 307)*

Courses taken for this certificate program may be applied to other certificate programs, as well as a degree program, where applicable. Additionally, some of the prerequisite courses have credit/challenge by exams available to students who have acquired the content knowledge of the required prerequisite coursework in a non-academic format. Please contact the Lead Faculty for more information.

● **Certificate in Construction Specifications**
(670-000-552)
*Faculty Advisor: Thomas Gatton • (858) 642-8484 • tgatton@nu.edu*

The Construction Specifications Certificate Program provides an opportunity for students to obtain the essential skills necessary for competency in the process of construction documentation through the life-cycle of the construction project and prepare construction documents. The program is aligned with the requirements of the Construction Specifications Institute’s (CSI) recommendations and manual of practice. This certificate program will prepare the student for taking the CSI certification exam as a Certified Construction Specifier (CCS). Students will complete courses to develop competency in the areas of engineering graphics, plans, specifications, estimating, scheduling, control, materials and methods, the construction process cycle, construction documents, procurement, facilities management, and project inception, delivery and design. Upon completion, students will understand the principles of contractual relationships, document organization and document preparation.

**Prerequisites for the Certificate**
(5 courses; 22.5 quarter units)

- EGR 319 Introduction to Engineering Graphics and AutoCAD  
  *(Prerequisite: MTH 215)*
- CEN 410 Construction Materials and Methods  
  *(Prerequisite: MTH 215)*
- CEN 413 Plans and Specifications  
  *(Prerequisite: EGR 319)*
- CEN 419 Estimating, Scheduling and Control  
  *(Prerequisite: CEN 410)*
- CEN 425 Design and Construction Process Integration

**Requirements for the Certificate**
(4 courses; 18 quarter units)

- CEN 450 Construction Documents I  
  *(Prerequisite: CEN 413, CEN 419)*
- CEN 453 Construction Documents II  
  *(Prerequisite: CEN 450)*
- CEN 460 Construction Specifications I  
  *(Prerequisite: CEN 453)*
- CEN 463 Construction Specifications II  
  *(Prerequisite: CEN 460)*

Courses taken for this certificate program may be applied to other certificate programs, as well as a degree program, where applicable. Additionally, some of the prerequisite courses have credit/challenge by exams available to students who have acquired the content knowledge of the required prerequisite coursework in a non-academic format. Please contact the Lead Faculty for more information.

● **Certificate in Electrical Systems Cost Estimating**
(670-000-553)
*Faculty Advisor: Thomas Gatton • (858) 642-8484 • tgatton@nu.edu*

The Electrical Systems Estimating certificate program provides an opportunity for students to obtain the essential skills for construction cost estimating with a specialization in electrical systems. This certificate is especially focused for individuals with significant field experience, but lacking cost estimating skills and academic preparation, wishing to perform construction cost estimating for electrical systems. Students will complete courses to develop competency in the areas of construction systems, project control, estimating, economics, management and accounting.

**Prerequisites for the Certificate**
(3 courses; 13.5 quarter units)

- EGR 313 Electrical Circuits and Systems  
  *(Prerequisite: MTH 215)*
- EGR 319 Introduction to Engineering Graphics and AutoCAD  
  *(Prerequisite: MTH 215)*
CEN 410 Construction Materials and Methods  
(Prerequisite: MTH 215)

Requirements for the Certificate  
(4 courses; 18 quarter units)

CEN 413 Plans and Specifications  
(Prerequisite: EGR 319)

CEN 419 Estimating, Scheduling and Control  
(Prerequisite: CEN 410)

CEN 420 Estimating, Scheduling and Control II  
(Prerequisite: CEN 419)

CEN 427 Electrical Systems Estimating and Bidding  
(Prerequisite: CEN 420)

Courses taken for this certificate program may be applied to other certificate programs, as well as a degree program, where applicable. Additionally, some of the prerequisite courses have credit/challenge by exams available to students who have acquired the content knowledge of the required prerequisite coursework in a non-academic format. Please contact the Lead Faculty for more information.

Certificate in Mechanical Systems Cost Estimating  
(670-000-554)  
Faculty Advisor: Thomas Gatton • (858) 642-8484 • tgatton@nu.edu

The Mechanical Systems Cost Estimating certificate program provides an opportunity for students to obtain the essential skills for cost estimating with a specialization in mechanical systems. This certificate is specially focused for individuals with significant field experience, lacking cost estimating skills and academic preparation, wishing to perform construction cost estimating for mechanical systems. Students will complete courses to develop competency in the areas of electrical and construction systems, plans and specifications, project control, estimating, bidding, control, economics, management and accounting.

Prerequisites for the Certificate  
(3 courses; 13.5 quarter units)

EGR 319 Introduction to Engineering Graphics and AutoCAD  
(Prerequisite: MTH 215)

CEN 410 Construction Materials and Methods  
(Prerequisite: MTH 215)

CEN 413 Plans and Specifications  
(Prerequisite: MTH 215)

Requirements for the Certificate  
(4 courses; 18 quarter units)

CEN 416 Mechanical and Electrical Systems  
(Prerequisite: MTH 215)

CEN 419 Estimating, Scheduling and Control  
(Prerequisite: CEN 410)

CEN 420 Estimating, Scheduling and Control II  
(Prerequisite: CEN 419)

CEN 429 Mechanical Systems Estimating and Bidding  
(Prerequisite: CEN 420)

Courses taken for this certificate program may be applied to other certificate programs, as well as a degree program, where applicable. Additionally, some of the prerequisite courses have credit/challenge by exams available to students who have acquired the content knowledge of the required prerequisite coursework in a non-academic format. Please contact the Lead Faculty for more information.

Certificate in Construction Safety and Inspection  
(670-000-555)  
Faculty Advisor: Thomas Gatton • (858) 642-8484 • tgatton@nu.edu

The Safety and Inspection certificate program provides an opportunity for students to obtain the essential skills for implementing and managing construction safety and quality programs through inspection. This certificate is specially focused for individuals with significant field experience, desiring a knowledge of management skills to perform field implementation of safety and quality through competent inspections. Students will complete courses to develop competency in the areas of electrical and construction systems, plans and project scheduling, estimating and control, inspection procedures and techniques, and management principles.

Prerequisites for the Certificate  
(5 courses; 22.5 quarter units)

EGR 307 Introduction to Software, Engineering and Ethics

EGR 313 Electrical Circuits and Systems  
(Prerequisite: MTH 215)

EGR 319 Introduction to Engineering Graphics and AutoCAD  
(Prerequisite: MTH 215)

CEN 410 Construction Materials and Methods  
(Prerequisite: MTH 215)

CEN 413 Plans and Specifications  
(Prerequisite: EGR 319)

Requirements for the Certificate  
(4 courses; 18 quarter units)

CEN 416 Mechanical and Electrical Systems  
(Prerequisite: MTH 215)

CEN 419 Estimating, Scheduling and Control  
(Prerequisite: CEN 410)

CEN 422 Field Inspection and Safety  
(Prerequisite: CEN 410)

EGR 440 Project Management  
(Prerequisite: EGR 307)

Courses taken for this certificate program may be applied to other certificate programs, as well as a degree program, where applicable. Additionally, some of the prerequisite courses have credit/challenge by exams available to students who have acquired the content knowledge of the required prerequisite coursework in a non-academic format. Please contact the Lead Faculty for more information.

MASTER OF SCIENCE IN SYSTEMS ENGINEERING  
(720-830)

(Non)

Area of Specialization in Lean Six Sigma  
(4 courses; 18 quarter units)  
(898)

The specialization courses as listed below will be offered in conjunction with the Management Sciences Division of VSE Corporation (http://www.vsecorp.com/services/management/index.html) and Extended Learning at National University. Successful completion of all four courses (EEX1201X, EEX1202X, EEX1203X, and EEX1204X) is required as part of the Lean Six Sigma specialization in the MS Systems Engineering Program.

GREEN BELT PROGRAM COURSES  
(2 courses; 9 quarter units)

EEX1201X Fundamentals of Process Analysis and Optimization

EEX1202X Operational Efficiency and Cost Effectiveness

BLACK BELT PROGRAM COURSES  
(2 courses; 9 quarter units)

EEX1203X Fundamentals of Leading and Managing Continuous Measurable Improvement

EEX1204X Advanced Topics in Process Analysis

GREEN BELT AND BLACK BELT CERTIFICATION COURSE (Not a requirement for the degree or area of specialization)

EEX1205X Six Sigma Project Practicum

Thus, the combined Green Belt and Black Belt program courses are
equivalent to 160 hours of instruction. EEX1205X is required only to obtain the Black Belt and Green Belt certifications in conjunction with the Green Belt and Black Belt program courses.

(New)

COURSE DESCRIPTIONS

CEN 427
Electrical Systems Estimating and Bidding
(Prerequisite: CEN 420)
This course builds on the advanced concepts of construction cost estimating techniques covered in CEN 420 and presents cost estimating techniques applied specifically to electrical systems. Advanced topics concerning electrical contracting and estimating procedures, job costs electrical labor units, unit costs, electronic estimating, estimate indexing, submittal preparation and review, change orders and cost adjustments are presented.

CEN 429
Mechanical Systems Estimating and Bidding
(Prerequisite: CEN 420)
This course builds on the advanced concepts of construction cost estimating techniques covered in CEN 420 and presents cost estimating techniques applied specifically to mechanical systems. Advanced topics concerning mechanical contracting and estimating procedures, job costs electrical labor units, unit costs, mechanical systems estimating, estimate indexing, submittal preparation and review, change orders and cost adjustments are presented.

CEN 450
Construction Documents I
(Prerequisites: CEN 413 and 419)
An overview of the construction project documents and processes, the stages of a typical construction project and the participants and their relationships, within the context of the construction project life-cycle. Introduction to activities of the project conception phase, schematic programming and program development and benefits and limitations of construction project delivery types and substitution procedures. Preliminary project descriptions, outline specifications, schematic design, design development stages, allowances, alternates and unit pricing.

CEN 453
Construction Documents II
(Prerequisite: CEN 450)
Continuation of CEN 450. Construction formats such as OmniClass™, UniFormat™, MasterFormat™, SectionFormat™, and PageFormat™ to organize, store and retrieve information. General and procedural requirements, methods of specifying, specification language and practices, project manual, procurement, warranties and construction bonds. Pricing, project information, agreements, construction stage submittals, project closeout, and facility management.

CEN 460
Construction Specifications I
(Prerequisite: CEN 453)
In-depth coverage of construction contracts and limitations, owner-contractor agreements, general conditions, supplementary conditions for modifications, bidding document changes, document organization and requirements coordination. Advanced concepts of the benefits of MasterFormat™ and UniFormat™, Division 01 and other contract relationships and Division 01 and the relevance to project manual organization.

CEN 463
Construction Specifications II
(Prerequisite: CEN 460)

CEN 470
Construction Contract Administration I
(Prerequisite: CEN 453)
Continuation of construction documents knowledge gained in CEN 453. In-depth coverage of documents used for construction and project delivery, the roles and responsibilities of project participants, preconstruction submittals and administrative procedures, pricing and bidding considerations, proper meeting procedures, and submittal maintenance procedures. Advanced concepts in the schedule of values, site visits, inspections, nonconforming work, quality assurance and quality control.

CEN 473
Construction Contract Administration II
(Prerequisite: CEN 470)
Continuation of the concepts of construction contract administration and processes, covered in CEN 470. Advanced topics on contract interpretation and modification, change order procedures, execution of work, claim handling methods, dispute prevention and resolution, measurement and payment methods, schedule of values usage, payment processes and liens. Project closeout, substantial and final completion, pre and post occupancy activities, project feedback and facility management transition.

School of Health and Human Services

(New)

COURSE DESCRIPTIONS

IHC 610
Self as Coach
Provides students with an opportunity for self exploration and related self work leading to personal growth and development. Students will examine their core beliefs, personal style, roles, defensive strategies, projections, etc. This exploration will enhance their coaching presence in their role as a health coach.

IHC 635
Social and Emotional Intelligences in Health Coaching
Provides student with a clear understanding of and appreciation for emotional social intelligence. Students will craft an individual emotional competency development plan. They will leave the course with a depth of knowledge concerning emotional and social intelligence and the ways in which they can develop these competencies in themselves and in their coaching clients.
