

SCHOOL OF BUSINESS AND MANAGEMENT

ASSOCIATE OF SCIENCE IN BUSINESS

Explore Business and Management Fundamentals

No matter the field, the product, or the size of the company, managing people in a business setting requires perceptiveness, motivation, and training. If you're intrigued by the notion of moving into managerial levels in the business world, the Associate of Science in Business is a natural place to get started. Designed to prepare you for entry-level management positions, the coursework is focused on your success; degree completion provides a transition path to a Bachelor of Business Administration degree.

You'll engage in courses in general business, accounting, economics, legal studies, management, and marketing to gain a broad understanding of the business world. You'll also pursue two prerequisites as part of general education requirements: Information Literacy and an introductory business mathematics course. With these in hand you'll have a fundamental understanding of basic business management and how it applies to planning and implementing an organization's strategic behavior.

Program highlights:

- Entire program can be completed online
- Understand the legal structure and tax implications of business types like sole proprietorships, partnerships, and corporations
- Explore the changing nature of business in a global economy, and see first-hand how marketing decisions can affect profits
- Learn the basics about the legal and ethical issues surrounding the business community

MAJOR IN BUSINESS

Academic Program Director: Farnaz Sharifrazi; (858) 642-8468; fsharifrazi@nu.edu

The Associate of Science in Business program is designed to prepare students for entry level management positions. The degree completion provides a transition path to a Bachelor of Business Administration (BBA) degree. The curriculum includes courses in general business, accounting, economics, legal studies, management and marketing. With a goal to maximizing student success, the program is designed with two prerequisites as part of general education requirements: introductory business mathematics and internet literacy. Other courses may be taken in any sequence.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Describe the types of business organizations and their basic functions.
- Describe the legal structure and tax implications of different types of business organizations such as sole proprietorship, partnership and corporation.
- Explain the functions of basic management relating to planning and implementing an organization's strategic behavior.
- Explain the changing nature of business in a global economy.
- Explain the basic accounting, finance, and management functions of business organizations.
- Explain how marketing decisions can help maximize profits.
- Describe the legal and ethical issues surrounding the business community.

Degree Requirements

To receive an Associate of Science in Business degree, students must complete at least 90 quarter units consisting of all courses as articulated below along with the required minimum 34.5 units of the Associate of Science General Education.
