BACHELOR OF SCIENCE IN NURSING

Deliver Hands-on Care Supported by Scientific Knowledge

If you are interested in a career that combines close human care with strong science, the Bachelor of Science in Nursing should be high among your choices. Changes in our evolving healthcare system have fueled an increased need for skilled nurses. This varied and important work includes recording patient medical histories and symptoms, giving patients medicines and treatments, and setting up plans for patient care or contributing to existing plans.

In the nursing program, you'll learn to carefully observe patients and record those observations to share with doctors. You may operate and monitor state-of-the-art medical equipment, and assist in performing diagnostic tests and analyzing results. You'll also learn effective ways to teach patients and their families how to manage illnesses or injuries.

The program helps you develop critical thinking, communication, and therapeutic nursing skills

within the framework of transcultural nursing. Upon graduation, you'll be qualified to manage the nursing care of culturally diverse clients in a variety of settings.

Program highlights:

- Formulate accurate nursing diagnoses based on collected data
- Plan, implement, and evaluate patient-related strategies
- Work with families to identify learning needs and share strategies to reach healthcare goals
- Meet and exceed standards of providing nursing care to a diverse set of clients in varied communities
- Explore and apply findings from research in nursing and related fields

The Bachelor of Science in Nursing (BSN) program prepares degree candidates to develop critical thinking, communication and therapeutic nursing skills within the framework of trans-cultural nursing. Graduates are able to manage the nursing care of culturally diverse clients in a variety of settings.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop caring, therapeutic nursing relationships with individuals, families and groups.
- Provide safe, high quality, culturally competent, patient-centered nursing care for individuals across the life span in a variety of settings.
- Participate in the continuous improvement of nursing care quality and safety.
- Use nursing judgment to manage, prioritize, and delegate patient care in a variety of health care settings.
- Effectively communicate and collaborate with patients and the interdisciplinary team.
- Demonstrate professional identity by incorporating established standards of practice within the legal and ethical framework of nursing.
- Apply best, current evidence into nursing practice to achieve desired outcomes.
